EDUCATION

Institute of Business Management — BS Computer Science | CGPA: 3.37 — Expected Jan 2027
TED University — Semester Exchange, Computer Engineering — Fall 2024

CERTIFICATIONS & ACHIEVEMENTS

- **ASPIRE Pakistan:** Pak Angels Gen AI, Top Performer (Cohort 11)
- **Claude Academy:** Claude Code in Action, Building with the Claude API, MCP, Claude Platform 101, Bedrock, Vertex AI
- **n8n Academy:** Foundations Pathway (Essentials, Integrations, In Practice: AI & Testing), Quickstart
- **NSCT:** Scored in the 96.7th Percentile
- **PIAIC:** Certified Cloud Applied Generative AI Engineer (GenEng)
- **DataCamp, PIAIC:** Data Analytics

EXPERIENCE

Traders Global Generation | Junior Software Engineer | Karachi, Sindh — Aug 2026 – Present

- Developing a social platform with an integrated marketplace, with **Redis**-based trend tracking and **AWS EC2**/**RDS** hosting.
- Supporting QA on an outsourced project through functional and regression testing, defect reproduction and fix verification.

Tapmad Entertainment | Streaming Intern | Karachi, Sindh — Dec 2025 – Feb 2026

- Developed a real-time video clipping automation platform ingesting live SRT subtitle feeds; used **FFmpeg** with GPU acceleration to auto-generate marketing clips, increasing productivity by **70%**.
- Built a full-stack web interface (**FastAPI** backend + HTML/CSS/JS frontend) for automated and manual clipping with custom outro branding options.
- Configured a production server end-to-end and containerized the complete pipeline using **Docker** for scalable deployment in a live environment.

JCCAIR Journal | Technical Administrator | Remote — Jun 2025 – Present

- Sole technical administrator for the journal's **Open Journal Systems** platform on Hostinger: server administration over **SSH**, **cron** jobs, PHP CLI troubleshooting and plugin configuration.

Websity Digital | Software Engineer Intern | Karachi, Sindh — Jun 2025 – Sep 2025

- Developed an internal **Streamlit** wrapper for the **DALL-E 3 API**, unblocking the entire content team from ChatGPT Pro rate limits and ensuring zero downtime in asset generation.
- Engineered a prospect-analysis dashboard automating data scraping and visualization, slashing proposal generation time from several hours to under **2 minutes** for batches of 100+ clients.
- Spearheaded internal tooling projects from backend **OpenAI API** integration to frontend UI design, executing with end-to-end autonomy.

PROJECTS

Final Year Project: AI Medical Diagnostic Application *FastAPI · React Native · CNN · RAG · AWS EC2*

- Independently architected the full-stack diagnostic tool (**FastAPI** backend, **React Native** mobile), training a custom CNN to deliver Kellgren-Lawrence (KL) grading with **97.8% accuracy** and sub-second inference.
- Solely engineered the **RAG** wellness agent and orchestrated **PyTest**-backed **CI/CD** pipelines, deploying the monolithic architecture to **AWS EC2 (g4dn.xlarge)** to support 32 concurrent users.

Big Data E-Commerce Analytics Pipeline *Hadoop · Apache Hive · Docker · Beeline · SQL*

- Constructed a containerized, fault-tolerant **Hadoop** cluster and engineered an **Apache Hive** star-schema data warehouse to process a **300,000-record** Brazilian E-commerce dataset.
- Optimized pipeline performance by tuning map-side join configurations, resolving out-of-memory bottlenecks and reducing execution time for complex multi-table joins by an estimated **40%**.

AI-Powered GitHub Repo Auditor *n8n · GitHub API · Gemini API · Google Apps Script*

- Automated AI-based repo analysis via form-triggered **n8n** workflows and **Gemini API**; filtered and chunked repo content for efficient analysis without cloning; sent HTML email reports.

LEADERSHIP & ACTIVITIES

Google Developer Student Club – IOBM | Executive Director, App Development — Jan 2024 – Dec 2024
Erasmus+ | Food Literacy Learning Program | Ankara, Türkiye — Oct 2024

- Led student–industry conversations as GDSC Executive Director; completed Erasmus+ week-long nutrition and food policy training organised by ODTÜ, MEVKA, AKAPDER & the Turkish Ministry of Agriculture.

SKILLS & INTERESTS

Languages: Python, TypeScript, Java, C++, C, Bash Scripting, PowerShell, HTML
Frameworks/Tools: FastAPI, React.js, Next.js, Node.js, Docker, AWS, Ansible, Linux Server Management, FFmpeg, Vercel, n8n, Postman, Tkinter, uv
Libraries/Skills: AI Agents, GPU Acceleration, Video Processing/Streaming, Pandas, NumPy, Automation, Matplotlib, Shadcn UI, Bootstrap
Interests: Chess, Horseback Riding, Strength Training, Swimming
